

## PRESS RELEASE

### **EWA Research Membership is available**

**The European Water Association is inviting European water-related research institutions to join and take part in the EWA network!**

**Press release 07/2018**

**Hennef, 20 November 2018. Due to the growing need to deliver intelligent, resilient and environmentally sensitive water and wastewater systems, the EWA would like to bring research and innovation establishments together to create partnerships to enhance this urgency.**

Hence, the EWA would like to meet the requirements by encouraging new ways of thinking, new processes and innovative technology and services. The membership supports European water-related research institutions to work and be part of the network of experts in the European Technical and Scientific Committee and other related working groups of the association. It offers a network of 50,000 individual professionals and technicians in Europe! To the existing members the EWA offers conferences, symposia and workshops. Researchers and scientists are invited to join the network to present their findings at these events.

Moreover, the value of becoming a Research Member of EWA includes the opportunity to know and create partnerships for EU innovation and research projects with other European research and industrial Institutions of the large EWA network.

The EWA believes that the platform brings added value to your institution. Join the EWA today as a Research Member! To learn more about the Research Membership, please go to <http://www.ewa-online.eu/membership.html>.

#### **EWA**

The European Water Association (EWA) is an independent non-governmental and non-profit making organisation promoting the sustainable and improved management of the total water cycle and hence the environment as a whole.

It is one of the major professional associations in Europe that covers the whole water cycle, as well as wastewater and drinking water, water and wastewater treatment related wastes. With member associations from many European countries, EWA includes most of the current European Union Member States as well as Norway and Switzerland. Today, EWA consists of 25 European leading professional organisations in their respective countries, each representing professionals and technicians for wastewater and water utilities, academics, technology providers, consultants and contractors, local authorities and regulators. The Association also has a growing number of corporate members: firms and enterprises, institutes or associations. EWA thus represents about 50,000 professional individuals and specialists working in the broad field of water and environmental management.
