The European Water Association, EWA, in cooperation with the German Association for Water, Wastewater and Waste, DWA, launches this seminar as a part of the technical program of the IFAT Munich 2022. In March 2021 the EU Commission published the "COMMISSION RECOMMENDATION (EU) 2021/472" about a common approach to establish a systematic surveillance of SARS-CoV-2 and its variants in wastewaters in the EU.

This seminar gives an overview about the implementation of this recommendation within the EU, describes the cooperation between the environmental and the public health sectors and demonstrates the approaches in several European countries.

The reception following this seminar is intended as a get together from the health and environmental sector.
