

## Issue 3/2021

### European Parliament questions

**18 water-related questions from Parliamentarians, from nitrate pollution in groundwater via modernising drinking water supply systems to deepening of rivers.**

The European Parliament is directly elected by citizens of all Member States. One key element within its right to political control is the right to table written and oral questions to European Institutions, largely to the Commission, to a smaller extent to the Council.

Members of Parliament show a regular interest of water issues in their Parliamentary questions.

In the period between 12 April and 31 May 2021, 18 water-related questions have been tabled.

EWA News provides you in each edition with the summary text of the questions and their authors and date, and links to the full texts of the questions plus - once available - answers.
