North Macedonia: Analysis of the situation in the water services sector

ADKOM, the Association of public utility services providers of the Republic of North Macedonia, has published an analysis of the situation and the challenges facing this EU Candidate Country.

The analysis commenced with a general overview of the challenges, underlining that - if water resources are managed with efficiency and balance, water can have a key role in the social well-being, economic prosperity as well as healthy eco-systems.

The document concludes with a set of findings and recommendations.
