

Issue 4/2023

Annual Commission report "Application of EU law" published 14 July 2023

Every year, the Commission publishes a report on monitoring the application of EU law during the preceding year. The report reviews key aspects of the application of EU law by Member States and the Commission's actions to enforce it in 2022. The main report sets out the Commission's most important investigations and infringement procedures under the Commission's political priorities. The Commission webpage presents infringement cases, EU Pilot processes and complaints, by policy area and Member State, over a five-year period.

Dedicated pages on policy areas provide information on how the Commission promoted compliance in these fields and refer to key judgments of the Court of Justice of the European Union. Member States pages publish more specific information on the individual country concerned.
