

Joint Research Center (JRC): Technical guidance - water reuse risk management for agricultural irrigation schemes in Europe

Article 5 of the Water Reuse Regulation calls for the developing of risk management plans. Considering world-wide established approaches (ISO 20426:2018, Australian Guidelines (2006), WHO Guidelines (2006, 2016)), and taking into account the European legal framework set out within the Water Framework Directive, the Joint Research Centre (JRC) of the European Commission developed the proposed technical guidelines for the application of the key risk management principles for the assessment and management of health and environmental risks linked to a water reuse system.
