

Tackling Riverine Plastic Pollution in the Danube River Basin

Policy Guidance published by edited and published by the Hungarian Association of Environmental Enterprises (HAEE) and the International Commission for the Protection of the Danube River (ICPDR)

Addressing transboundary riverine litter pollution demands a multifaceted strategy, incorporating harmonized actions, standardized measurements, advanced waste management techniques, and heightened awareness on an international scale.

This new publication fills a critical gap, emphasizing the need for regulatory frameworks to establish effective waste management systems and deter illegal waste disposal.
