Nitrates Directive

Foreseen amendment of annex III by addressing RENURE fertilisers

The Nitrates Directive establishes inter alia limits for the application of livestock manure applied to the land: The amount may not annually exceed an amount of manure containing 170 kg N per hectare (annex III 2.) A

Commission initiative would allow for the use of so-called RENURE fertilisers in addition to the limit value of 170 kg N per hectare and year from manure.
